The Adele & Dale Young Education Technology Center

The College of Education & Human Services at Utah State University
2845 Old Main Hill - 170 Education Bldg - Logan, UT - 84322-2845
Nathan Smith, Director (Nathan.Smith@usu.edu)
435-797-3377

A Special Invitation for Education Students

The Adele & Dale Young Education Technology Center, or YETC, is the resource center for students and faculty in the College of Education and Human Services at Utah State University. It's home to a K-12 curriculum library, student open-access computer lab, NASA Educator Resource Center, and the technology services available to the college..

As a student in the college, it would be well worth your time to tour the facility and meet Nathan Smith, the Director. Let him take some time to acquaint you with the resources available to you. Even if you've been here a while, you'll find there have been many new resources recently added. For example, the YETC added over a terabyte of educational resource files you can copy or use - videos, podcasts, lesson plans, computer freeware, audiobooks and eBooks, and much, much more.

The YETC is a place where you not only can do your homework or find resources. It's also a learning place. There are tutorials for using technology hardware and software. Free technology training workshops are also hosted each semester. Come and explore and learn!

Please call or email Nathan Smith for more information, or to schedule a tour of the facilities. Also, some of the great resources on TeacherLINK are password protected. Please stop by or call to get the current year's username and password.

What is the YETC?

The YETC serves the College of Education and Human Services as:

 • a K-12 curriculum materials library.
 • a student open-access computer lab facility.
 • a NASA Educator Resource Center.
 • a technology consultation and training facility.
 • an educational resource center.

Please visit our website for more information:
