Is Engineering for You?

Do you enjoy . . .

. . . finding out how things work?
. . . solving problems and puzzles?
. . . creating and building things?
. . . working with computers?
. . . studying science and mathematics?

If you answer yes to most of these questions, consider engineering as a career. Engineers work in many areas. NASA engineers work in the following fields:

• Aerospace engineering
• Ceramic engineering
• Chemical engineering
• Civil engineering
• Computer engineering
• Electrical and electronic engineering
• Industrial engineering
• Mechanical engineering
• Metallurgical engineering
• Nuclear engineering

What kind of engineer could you become?
Find out what each type of engineer listed above does and what their qualifications are.
