Is Engineering for You?

Do you enjoy:

- Finding out how things work?
- Solving problems and puzzles?
- Creating and building things?
- Working with computers?
- Studying science and mathematics?

If you answer yes to most of these questions, consider engineering as a career. Engineers work in many areas. NASA engineers work in the following fields:

- Aerospace Engineering
- Ceramic Engineering
- Chemical Engineering
- Civil Engineering
- Computer Engineering
- Electrical and Electronic Engineering
- Industrial Engineering
- Mechanical Engineering
- Metallurgical Engineering
- Nuclear Engineering

What kind of engineer could you become?

Find out what each of the engineers listed above does and what their qualifications are.
