First, go to IMAGE under the menu bar. Click RESIZE and then CANVAS SIZE...
An options box will appear...

1: This is the current size of your image.
2: This is where you put how much you want to adjust your image by.
3: Have this box checked if you want to add the space in addition to the current image.
4: The box represents your image, and the arrows are where the image will add the extra space. You can move the box in a different area by clicking any of the arrows.
5: This will change the color of the additional canvas.
6: Click OK when done.
