

Adobe Acrobat: Create a PDF from a scanned document

Sometimes it is beneficial to make a PDF file from something scanned into the computer. This is an easy way to do so.

Step 1: Create PDF from scanner

Choose **File > Create PDF > From Scanner**

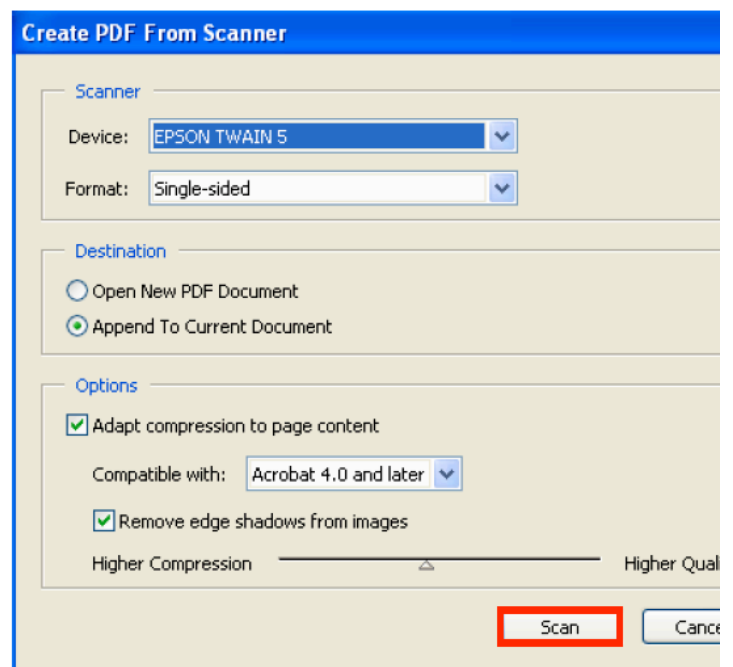

Step 2: Choose variants

Select your scanner device.

Choose Single or Double sided and select if you want to create a new PDF or append to an open PDF file.

Choose a compatibility level and set compression and quality.

Click **Scan**.

Step 3: Save the document

Choose **File > Save As** to save your web page as a PDF.
