Signs of a Malfunctioning Print Cartridge

1) Faded print jobs (If the words on a printed page are not as clear as they should be, it's an indication that the ink in the print cartridge may be low)
2) Ink marks, smudges or spots on a printed document (refer to the example above) This probably means there's a problem with the print cartridge. Replace it for now, and then let Nathan Smith know.
3) A message appears on the printer displaying "Order Cartridge." When this message appears, about 15% of the toner remains in the cartridge. You can continue printing using the cartridge if it displays this message, but keep an eye on it and look for blemishes in the quality of the print jobs. If there are any blemishes such as the ones described above, it's best to change the cartridge. When the toner in the cartridge it totally gone, the printer will display this message, "Replace Cartridge." If you get this message, change the cartridge immediately.

When deciding whether to change the print cartridge or not, look for these signs listed below. One or more of these signs is a good indication that's it's time for a new print cartridge.

*Blame It on Feminism* by Susan Faludi

“To blame feminism for women’s lesser life is to miss entirely the point of feminism, which is to win women a wider range of experience,” claims Faludi. She begins by making the point of some that women have achieved equality and it’s their own fault that they are now miserable, being alone and childless to name a few reasons for their so-called misery. This article shows one example after another of how our socio-cultural influences of news media, books, films,
Checking the Toner Level

Before you change the cartridge, it's a good idea to check the toner level. To do this, follow the directions below:

1) Press **MENU** to open the menus.
2) Use the **UP** and **DOWN** buttons (The buttons above and below the green checkmark button) to scroll to **INFORMATION**, then press the green checkmark button.
3) Use the **UP** and **DOWN** buttons to scroll to **PRINT SUPPLIES STATUS PAGE**, and then press the green checkmark button.
4) The supplies status page gives you a summary of the amount of supplies available in your printer. The cartridge information is located near the upper left corner of the page. It will give you a percentage of the amount of ink left in the cartridge. If the printer is giving you problems, but the ink in the cartridge is quite full, change the cartridge for now, and let Nathan Smith know about the problem.
Changing the Print Cartridge

To change the print cartridge, follow the directions below, and refer to the diagram above.

1) Turn the printer off.
2) Open the top cover. The immediate thing you will see is the printer cartridge.
3) The cartridge sits at about a 45 degree angle inside the printer. Take the cartridge and pull it straight out at that same angle.
4) Obtain a new printer cartridge. (They are stored in the cupboard labeled Photocopier Supplies just to the right as you walk into the cage. Remember, we have three different types of printers, make sure you pick the right cartridge for the printer)
5) Open the cartridge and tilt it back and forth from front to back 5-6 times. (This will distribute the ink around the cartridge)
6) On the side of the cartridge you will see an orange tab. Pull it out.
7) Hold the cartridge at a 45 degree angle and place it into the printer (If the hp logo on the cartridge is facing you, you are holding it the right way)
8) Turn the printer on and print a supplies status page (See step above) to test if the printer is working correctly.
