

Starting Up and Shutting Down the Mac Computers

How to turn the mac computers on and off.

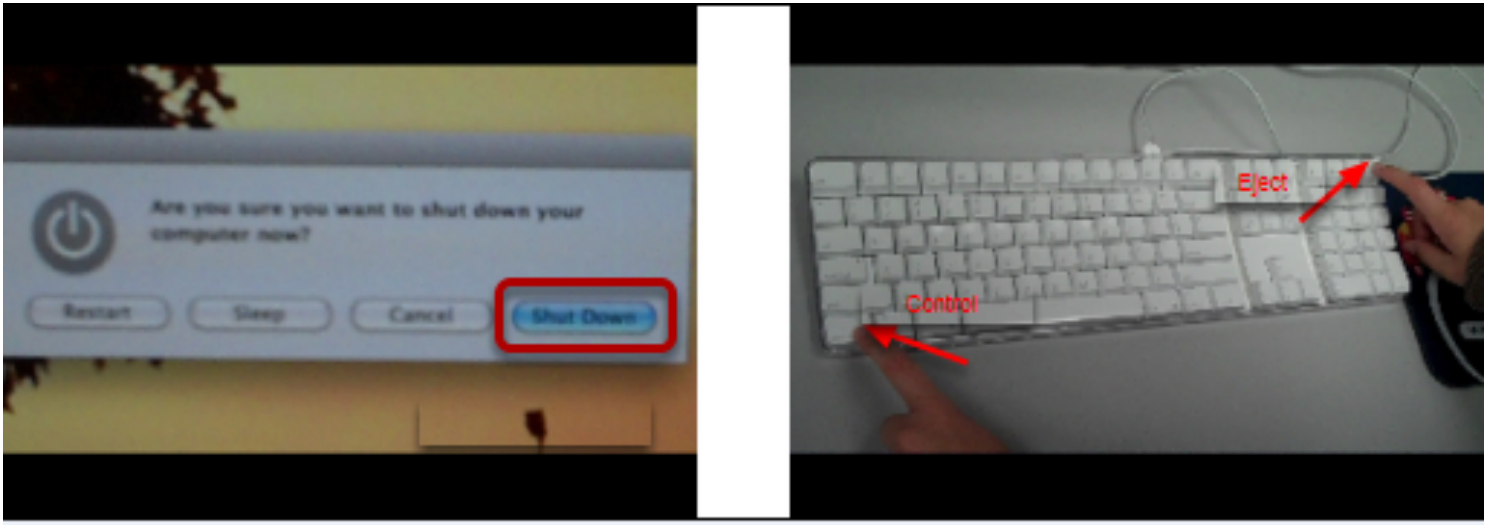

Created June 30, 2009; By: Sarah Zabriskie. Updated July 09, 2010

Starting Up the Mac Computers

Unlike the pc computers, the mac computers have to be turned on manually. In the back of the monitor there is a button located in the bottom left corner. Press this button and the computer will start up. (Refer to the picture above)

Shutting Down the Mac Computers

To shut the mac computers down, follow the directions below:

- 1) Ensure that all monitor's are clear and programs are shutdown.
- 2) Press **>Control< >Eject<**
- 3) A window will appear with the options to restart, sleep, cancel, or shutdown. Shutdown will already be highlighted.
- 4) Select 'shutdown' or press return (enter).
